Summary

I am a technical leader with 20 years of experience in building and running software products for various domains. I have a solid track record of delivering on business goals and technical strategy for organizations of various sizes. I have deep technical skills in engineering and technology. I firmly believe in getting things done.

Until very recently, I worked at Omio in Berlin where I led a team of data engineers and analysts to build a strong BI and data engineering foundation.

Some of my recent accomplishments include

- a. Created a Business Intelligence / **data-platform strategy** for Omio and grew the platform from its nascent stage into a sophisticated, event-based, **self-service big data platform**. This platform now covers multiple data-sources, ingestion systems, storage (data warehouse and lake) as well as analytics/visualization services.
- b. Set up systems and processes to enable data-ops and **self-servability** of analytics at Omio and reduced dependence on central data teams.
- c. Developed strong relationships with multiple stakeholders across the organization to provide reliable data products for their rapidly growing needs.
- d. Led the growth and evolution of engineering sys-

tems and architecture, successfully managing tech debt, future road-map and rapid prototyping to keep Omio's data engineering systems up-to-date.

- e. Grew a motivated team of engineers and analysts with active participation in their career development.
- f. Setup multiple initiatives to **improved the ROI from data**. These included setting up a Data Chapter, introducing tools like **dbt** to improve Analytics workflow and setting-up cross-functional data teams to improve productivity.
- g. Successfully established **data governance** and GDPR processes within the data org.

I am an engineer at heart and fairly hands-on with coding. I am also active in many open source communities in the data space.

Outside work, I am passionate about giving back to the community by mentoring budding engineers and engineering managers across the world. I offer free mentoring over hangouts as a member of a mentoring club. Occasionally, I provide consulting to startups in Europe and India on their data engineering setup.

I write frequently on data strategy, engineering and leadership on my [blog](#), [LinkedIn](#) and [Twitter](#).

Recent writings

Manager Feedback - 65 questions A list of questions for Manager feedback covering aspects of Psychological Safety, Purpose, Autonomy, Mastery and Delivery.

Data Team Roadmap A detailed post about my experience creating a 2021 strategy roadmap for my team at Omio.

Guiding principles for a data engineering team A suggestion on a set of guiding principles that a Data Team could use as a north star in decision making.

16 fundamental principles for transforming data in a warehouse Some basic principles for data transformation and data modeling.

Migrating a data warehouse across Cloud providers My experience and approach as I led my team to migrate our entire data warehouse from Redshift to BigQuery.

Work Experience

Beat

Head of BI and Data Engineering

Leading the Data modeling and Data Governance Initiatives at Beat.

ATHENS, AMSTERDAM AND REMOTE

July 2021 – Present (0 months +)

The Mentoring Club

Mentor (Part time)

Offering pro bono mentoring to engineers and new engineering managers on varied topics such as career growth and engineering leadership. - <https://www.mentoring-club.com/the-mentors/rahul-jain>

BERLIN, GERMANY

Apr 2020 – Present (1 year 2 months +)

Omio (formerly GoEuro)

Principal Engineering Manager, BI

Responsibilities included:

- Providing a vision to the team for the evolution of our data platform and data strategy.
- Providing technical leadership to my team with respect to system design and architecture, managing tech debt and future planning and prototyping to keep our engineering systems up-to-date.
- Working with multiple stakeholders including BI analysts, data scientists and other business functions to provide data for their rapidly growing needs.
- Working with the engineering leadership to establish technical best practices in the area of data engineering
- Growing a motivated team with regular feedback cycles and participation in their career development.
- Managing data infrastructure cost
- Managing data governance around privacy (GDPR), meta-data management and data quality management.

BERLIN, GERMANY

Nov 2017 – Jun 2021 (3 years 8 months)

Key accomplishments:

- Evolved the data engineering architecture from an early stage batch heavy system to a state of the art data platform based on **real time streaming systems**.
- Stabilized the data pipelines from an MTBF of 10 days to 90 days.
- Significantly improved timeliness, quality and reliability of analytics data.
- Led the development of self serve, **real-time data ingestion platform based on Kafka and Apache Spark** that enabled any team at Omio to setup their own ETL pipeline to send data to warehouse.
- Grew the BI engineering team from 4 members to 10.
- Executed a **complex data warehouse migration project to move from Redshift to BigQuery**. This migration resulted in an annual saving of \$200K in cloud cost.

Thoughtworks

Lead Consultant and Tech Lead

Key responsibilities included:

- Technical Leadership on Thoughtworks projects.
- Responsible for end to end delivery of product features.
- Architecture and Design of software systems.
- Implementing agile technical practices and processes
- Agile Consulting

BANGALORE, CHENNAI & BOSTON

Oct 2012 – Nov 2017 (5 years 3 months)

Credit Suisse

Senior Analyst and Java Development Lead

Responsible for developing multiple java/j2ee based ETL jobs used for ingesting large volumes of financial market data (balance sheets, stock prices, earnings estimates etc.) into Credit Suisse's data products.

SINGAPORE

Jul 2007 - Sep 2012 (5 years 3 months)

Infosys

Software Developer & Project Lead

Worked on various projects as a senior Java programmer and later as a project lead.

BANGALORE, HYDERABAD AND BOSTON

Jan 2000 - Jun 2007 (7 years 6 months)

Education

Seth Godin's altMBA

Workshop on Leadership and management, Change making

ONLINE

2021

Indian Institute of Technology (ISM)

Bachelor of Technology, Mining and Mineral Engineering

Main project on creating a simulation model of the grinding efficiency of a [ball-mill](#) based on feed properties.

INDIA

1995 – 1999

Skills

Technical expertise:

- Engineering Leadership, strategy, planning and execution
- Agile software development processes
- Software design principles and enterprise integration patterns
- Microservices and service-oriented architecture
- Data engineering principles and DataOps
- CI/CD pipelines and modern software release processes
- Programming languages - Java, Python, Scala
- Distributed processing and storage systems - Kafka, Elasticsearch, Apache Spark
- Cloud platforms - AWS and GCP
- MPP datawarehouses - Redshift and BigQuery
- Data Modeling and data warehousing. Data lake Architecture
- ETL orchestration frameworks like Airflow
- DevOps Toolchain - Virtualization, Containers (Docker) and Kubernetes
